SIVAPRASAD GALI

Data Engineer | Cloud & Enterprise Data Specialist

Hamilton, New Zealand 3216 | 0204455779 | sivagaali9384@gmail.com | linkedin.com/in/sivaprasad-gali-azure-data-engineer

PROFESSIONAL SUMMARY

Collaborative Data Engineer with over 9 years of active experience designing, building, and operating enterprise data platforms, cloud lakehouses, and high-throughput ETL/ELT pipelines. Proven expertise across Azure Data Factory, Azure Databricks, Azure Synapse Analytics, SQL Server, Microsoft Fabric, Snowflake, and Power BI. Experienced in operational platform ownership, query optimization, performance tuning, and implementing robust security, access controls, and automated data quality validation across enterprise projects.

TECHNICAL SKILLS & EXPERTISE

Cloud Platforms & Lakehouse: Azure, Microsoft Fabric, AWS (S3), Databricks, Snowflake
Data Engineering & ETL/ELT: Azure Data Factory (ADF), SSIS, PySpark, Python, SQL, Stored Procedures, dbt
Databases & Warehousing: Azure Synapse Analytics, SQL Server, PostgreSQL, Oracle, MySQL, Medallion Architecture
Reporting & Analytics: Power BI (DAX, Semantic Models, Enterprise Gateway), SSRS, Self-Service Analytics
Governance & DevOps: Data Quality Validation, RBAC Access Controls, Azure Key Vault, CI/CD, Azure DevOps, Git

PROFESSIONAL EXPERIENCE

Azure Data Engineer - Digital Wagons IoT Project
10/2023 - 07/2026

KiwiRail | Auckland, NZ

- Implemented digital tracking and real-time location and status monitoring systems for rail freight wagons across New Zealand.
- Integrated real-time streaming status telemetry (GPS location, temperature, load weight) from wagon-mounted IoT devices.
- Gained experience exploring Microsoft Fabric lakehouse migrations and Azure Databricks for modern cloud data analytics.
- Built user-friendly dashboard interfaces allowing operations teams to easily monitor active fleet health and routing.

Azure Data Engineer - Cloud Database Migration Project
04/2023 - 12/2024

KiwiRail | Auckland, NZ

- Formulated and executed comprehensive data migration strategy to transfer on-premises storage to Azure Synapse Analytics.
- Designed secure, highly optimized ETL/ELT pipelines using Azure Data Factory to move data from diverse legacy endpoints.
- Optimized active data transfers and database indexing structures, significantly accelerating processing speed and data availability.
- Governed post-migration technical support, resolving schema mapping errors and validating target database performance.

Senior Consultant - Azure Data Engineer & Power BI (Banner Health Project)
07/2021 - 10/2022

Capgemini | Hyderabad, India

- Engineered highly scalable Azure Data Factory pipelines to ingest, clean, and stage health plan data into Azure Data Lake.
- Successfully migrated legacy SQL Server Integration Services (SSIS) packages to cloud-native ADF execution flows.
- Automated complex database migrations from Oracle PL/SQL sources to structured PostgreSQL cloud targets.
- Designed modern self-service reports and dashboards in Power BI utilizing optimized DAX calculations and dataset modeling.
- Maintained secure, automated data refreshes by establishing and administering enterprise Power BI Gateway connections.

Consultant - MSBI Developer (General Motors Project)
11/2019 - 06/2021

Capgemini | Hyderabad, India

- Authored and optimized high-performance SSIS ETL packages to extract and process heavy vehicle manufacturing data.
- Structured, indexed, and maintained SQL Server relational databases utilizing complex queries, views, and stored procedures.
- Developed detailed operational and summary reports in SSRS to support manufacturing metrics and executive decision-making.
- Managed and scheduled daily database automation routines using SQL Server Agent Jobs, proactively resolving failures.

Consultant - MSBI Developer (Reyes Holdings Project)
08/2017 - 10/2019

Capgemini | Hyderabad, India

- Designed and supported end-to-end SSIS applications to process distribution data from SQL Server, CSV, and Excel sources.
- Created tailored data transformations, executing secure SFTP retrievals and verifying source-to-target load counts.
- Designed highly visible custom visuals and reports in Power BI to analyze regional distribution volumes.

Consultant - MSBI Developer (Amlin Solvency II Project) **05/2016 - 07/2017**

Capgemini | Hyderabad, India

- Formulated SSIS packages to extract, validate, and load financial insurance data into dedicated data warehouses.
- Configured package error handling, logging, and SQL Server job agents to ensure high-availability ETL execution.

EDUCATION & CERTIFICATIONS

Master of Computer Application (MCA) Osmania University, Hyderabad, India (May 2009)
Bachelor of Science (B.Sc. - Math, Physics, CS) Sri Venkateshwara University, Tirupati, India (May 2005)

Certifications: DP-203 Microsoft Certified Azure Data Engineer Associate | 70-778 Microsoft Certified Power BI
